

**PROJECT COORDINATOR
SUPPLEMENTAL QUESTIONS**

1. This position will be responsible for project management. Please describe your experience in project management. Specifically include any experience in environmental restoration design, permitting, and/or construction. Reference any experience reviewing engineering and design plan sets. If none, type N/A.
2. This position will be responsible for ensuring grant compliance. Please describe your experience in federal and/or state grant management. If none, type N/A.
3. This position will serve as the primary point of contact for design, permitting, and construction management of both the Pensacola Bay System Oyster Restoration and Carpenter Creek Restoration. Please describe your experience liaising with local, state, and federal government agencies and communicating with the public. Specifically reference any experience engaging residents, delivering presentations, responding to inquiries, liaising with property owners, and communicating with permitting agencies. If none, type N/A.
4. This position will oversee, in conjunction with the entire PPBEP team, design and construction of the Pensacola Bay Oyster Restoration Initiative. The Initiative is a ten-year goal to restore 1,500 acres of oyster habitat across the Pensacola Bay System. The Initiative proposes design and permitting of the entire 1,500 acre restoration target including multiple restoration objectives (i.e. habitat, fisheries, ecosystem services). Please describe how you would approach managing this large-scale habitat restoration project.
5. This position will oversee, in conjunction with the entire PPBEP team, design and construction of the Carpenter Creek Restoration Project. The goal of the project is to restore 2.5 miles of Carpenter Creek to improve water quality by reducing sedimentation, improve habitat by stabilizing the riparian corridor, and create public access to the Creek. The Creek corridor runs through an urbanized area with the majority of the property held in private ownership. Based on your understanding of the project, please describe how you would approach working with the design firm and property owners to obtain access necessary to design, permit, and construct a successful project.
